MOOR DVD'S

Four Volume Series:

Chip Carving 1 hour each

Volume One: Introduction to Chip Carving

This DVD introduces the carver to the tools of chip carving and provides instruction in sharpening technique and the holding positions for the cutting and stab knives. Three sided, curved, and straight-line chips are taught and applied to numerous straight borders including the following designs: zigzag, positive and negative diamonds, Ing rune, and a rope.

#MCDVD-1 \$19.95

Volume 2: Rosettes and Curved Borders

The three types of chips are revisited with focus on how to approach larger and more difficult patterns. Three rosettes (interlocking circles, seven point and twelve point) are drawn and carved in alternative ways. Curved borders suitable for round or oval chip carving projects are drawn and carved. Patterns include scalloped, ribbing, and ribbon.

#MCDVD-2 \$19.95

Volume 3: Grids, Free Form and Finishing Part I

Drawing and chip carving three variations of the grid is completed along with three border alternatives. Application of the grid is discussed and illustrated with completed projects. Free form motifs are introduced along with suitable borders and transferring techniques. Applications of free form chip carvings are illustrated on completed projects and instruction is provided for adding color as well as a clear finish.

#MCDVD-3 \$19.95

Volume 4: Lay-out, Lettering and Finishing Part II

This DVD approaches the lay-out of a chip carving project versus the drawing of a pattern with a focus on creating a well balanced and aesthetically pleasing design. Attention is given to project assembly and preparation, pattern choice for the wood, finish and person whom the project is for. Laying out letters is given special attention with application to curved pieces demonstrated. Two styles of lettering are chip carved. Procedures for applying a stain finish are discussed and illustrated.
