CARVING TOOLS by Flexcut™

MICRO-PALM CARVING TOOLS

These tools have their edges forged down even thinner than our other palm tools. Cutting with these fine edges allows the carver to work extremely close to adjacent detail without crushing wood fibers that can lead to "chipping out." The 45° V-tool offers a deep, dark, visible cut while keeping an ultra narrow width. The set of four contains one of each tool.

KN-16

FLEXIBLE DRAW KNIFE

Has 5 inches of workable edge, designed to flex around contours where large amounts of stock need to be removed quickly. Can be flexed to accommodate concave or convex surfaces. Curved edge gives a skew-like cutting action for a low resistance cut. Works great for carving chair legs, hollowing chair bottoms or quickly roughing-out decoys.
