## ALUMINUM OXIDE POINTS

(RED) #F-[ #]....\$2.10 ea.

For fine to medium finishing work on wood, steel and malleable iron. Works on porcelain and glass, too. 3/32" shanks. Maximum speed rating: 35,000 RPM.

## ALUMINUM OXIDE POINTS

(WHITE) #F-[ #]....\$2.10 ea.

400 grit, 3/32" shanks

## SILICON CARBIDE POINTS

(GREEN) #F-[ #]...\$2.10 ea.

300 grit, 3/32" shanks

## SCOTCH-BRITE RADIAL BRISTLE DISC

Flexible bristles can sand areas with detail, irregular, curved or flat surfaces. Remove "fuzzies" without losing detail with fine grits or carve and texture with coarse grits. 3M Cubitron™ and aluminum oxide grains embedded throughout plastic bristles. 3/4" and 9/16" use mandrel M-1, M-6, M-13 or M-15 (p. 49). M-1 is probably the best choice.

*2" use mandrel M-30 or M-31 with 1/4" shank.*

- M-30 1/4" flat head mandrel, 1/4" shank ..... \$2.00
- M-31 screw type mandrel, 1/4" shank ..... \$3.60

	Price
6 pack 3/4" & 9/16" .....	\$ 6.95
6 pack 2" .....	\$12.95

## HUMMUL NATURAL DIAMOND CUTTERS

□ diamond points. Conventional diamond points have a steel core to which the diamond abrasive is bonded, but the abrasive wears off quickly because the form doesn't have any "give." Without this resiliency, friction strips away the abrasive prematurely.

The Hummul Natur□ form, resulting in a uniformly dense diamond coating for rapid grinding performance. Only a light pressure is needed. 3/32" shanks. Medium 140/170 grit. Illustrations show actual size.
