

WOODBURNING TOOLS *by Colwood*

COLWOOD WOODBURNING SYSTEMS

Colwood designed each control unit with a large reserve of power and precise temperature control. Manufacturer guarantees unit for two years.

UNITS: Offer precise temperature control over wide limits using a numbered (0-10) dial. Each comes with an ultra-flex handpiece cord.

THE GALAXY

Digital Precision

(Hand-piece not included.)

- LED display for clear, concise burner setting
 - Voltage regulator which automatically compensates for fluctuations in line voltage
 - 4 year warranty
- #CE-2013 Galaxy \$170.00

THE CUB

- Compact.
 - On/off switch in temperature dial.
 - Pilot light.
 - Handpiece cord.
- #CE-2000 Cub \$59.95

THE DETAILER

- Separate lighted on/off switch.
 - Handpiece cord.
 - Clip for mounting handpieces.
 - Tabletop model.
- #CE-2001 Detailer \$72.95

THE SUPER PRO 2

SPECIAL PRICE!

- Heavy duty/detail switch.
 - Selectable front panel switch allows carver to have 2 different tip styles set up and ready to use.
 - 2 handpiece clips.
 - 2 thermal barriers for easy handpiece cord replacement.
 - Separate lighted on/off switch.
 - 1 standard cord & 1 heavy duty handpiece cord
- #CE-2006 Super Pro 2 \$96.95

HANDPIECES:

Made from a molded, valox plastic material, resulting in far superior insulating properties that keep the handpiece cool to the touch. Each unplugs at the cord for easy storage. Rotation is at the connector, relieving the pull and strain produced from the cord.

REPLACEABLE TIP HANDPIECE

- Allows replacement of tip only. (*Tip not included.*)
 - One replaceable handle accepts all tips.
 - Cork grip.
- #CE-RT-HAN \$14.95

FIXED TIP HANDPIECE

- No wait for cool down—change handpieces quickly.
 - Cork grip.
- #CE-FT-[tip #] \$12.50
[Specify tip # — all except “Special Purpose Tips”]

ACCESSORIES:

DETAIL-MASTER ADAPTOR CORD

- #CE-0850 \$15.50
#CE-0850H (heavy duty cord) \$17.95

EZ TIP PULLER

- Constructed of lightweight stainless steel.
 - Eliminates any difficulty in removing the RT Tip from the RT Handle—just squeeze and pull.
- #CE-0155 \$4.95
REDUCED—“SAFETY SPECIAL” \$3.50

HANDPIECE CORD

- #CE-0750 \$12.50
#CE-0801 HEAVY DUTY (16 AWG) \$14.25
#CE-0802 HIGH POWER (14 AWG) \$16.75

CORK REPLACEMENT

- #CE-0150 \$1.25

HANDPIECE CLIP

- For resting handpiece.
#CE-0100 \$1.00

TIPS AND REPLACEABLE TIP HANDPIECE SOLD SEPARATELY.

Order # CE-0866\$39.95

USE OF COLWOOD TIPS:

A,D,J Rounded Tips — Used anywhere on the carving. These tips are for concaved areas, such as under the neck and where the leg joins the body. They will follow concaved surfaces without digging into the wood. The "J" tip can be used to outline feathers. Can be used to turn a tight radius.

B,F,G,K Pointed Tips — Used anywhere.

Tip C — A writing tip. Also used to burn nostrils and for burning plaques and designs on wood.

DA and DG Special Purpose Tips — Double line burning tips allowing you to burn two lines simultaneously.

Tip E — A general purpose tip with a cutting edge on each side.

Tip FSL, FSM and FSS — Designed to burn scales on fish. FSL-1/4", FSM-3/16", FSS-1/8".

Tip H — The same size and shape as the G tip, but make with a heavier gauge material. This tip is sharpened with a wider angle. It will burn a fine line, but does not burn as deeply into the wood as other tips.

Tip LE — The flame tip. A smaller version of the E tip ideally suited for smaller carvings. It has a cutting edge on both sides.

Tip LM — Same shape as the M but a little longer.

Tip M — A micro tip, especially useful on miniatures and wherever fine detail burning is desired.

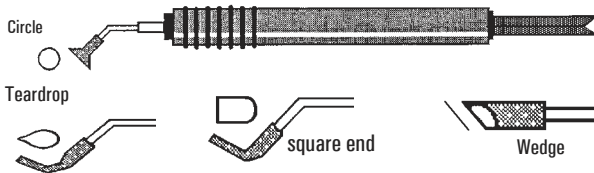

Tip PS — Very useful for burning in tight and hard-to-reach areas like under wings.

Tip R — Used to burn circles. Available in 3/16" and 3/32".

Tip S — Designed for shading and raising feathers on carvings.

Tip SQ — Used in raising of shafts and outlining feathers. Also suited for flat burning and for raising sharp lines, shading and calligraphy.

WOODBURNING TIPS by Pat Kennedy

PAT KENNEDY'S REPLACEABLE FISH SCALE TIPS (For use with Colwood)

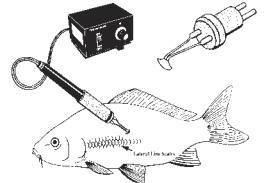

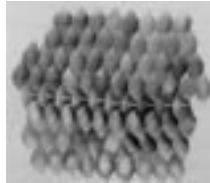

The Pat Kennedy Fish Scale System was designed exclusively for Colwood's woodburning tools. And it is far superior than techniques presently being used. For use with replaceable tip handle (order separately). Unique features include:

- **Authenticity**—Unlike many others, the tips are reproductions of actual fish scales.
- **Precision**—Scales are the exact shape and contour of fish scales.
- **Efficiency**—once scales are burned in, no additional carving is required.
- **Time saving**—With two of Pat Kennedy's fish scale tips (CERT-PK8 and CERT-PK9), you can produce the fish scale and the lateral line with one burn—no lateral line carving is required.
- **Effort saving**—Complete scale surface burn—no sanding is required.
- **Adaptability**—Can be used with any of Colwood's units.

Order #CERT- [tip #] **\$23.95 each**

Tips pictured are actual size.

SPECIAL PURPOSE TIPS

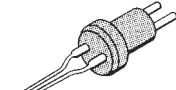

BALL BURNISHING TIPS

Heated and polished ball tips are the only tips of their kind on the market.

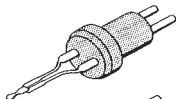

Advantages:

- Melt the cellulose fibers of wood
- Eliminate the need to seal the wood, because melted cellulose fibers will not return to their original shape
- Can be used on a variety of carving tasks:
 - Raising a duck bill's nostrils
 - Indenting around a duck bill nail
 - Carving wrinkles on birds and fish
 - Modeling around eyes
 - Modeling bird feet
 - Finishing the center shaft of feathers
 - Signing
- Available in 3 sizes
